Team25 Convolution Interface

IO

Name	Size	I/O	Function
clk	1	input	Driving clock signal
rst	1	input	Reset state machine
conv_ready	1	input	Initialize ready/valid handshake.
sample_a	NINPUT	input	First sample to multiply
sample_b	NINPUT	input	Second sample to multiply
valid	1	output	Indicates multiply+accumulate is done
sample_sel	clog2(NSAMPLES)	output	Selects sample from external device
conv_out	clog2(NSAMPLES) + 2*NINPUT	output	Output of multiply and accumulate on all samples
